Bird Class
Monongalia Master Naturalists
May 27, 2019: West Virginia Botanic Garden
Field Trip: June 1, 2019 9:00 am Cranesville Swamp
Presenter: LeJay Graffious
lejay@oldhemlock.org
http://oldhemlock.org/foundation/community-outreach/

Title: West Virginia Master Naturalist Class: BIRDS

Objectives: Become familiar with strategies and techniques of field identification of WV birds. Be introduced to some aspects of bird behavior and adaptations, and to methods of bird study.

Class Type: Core curriculum

Time: 4 hours

Optimal season: Spring

Materials: Binoculars, field guides.

Expected outcomes:

The student will gain a basic understanding of
1. how to identify birds in the field by sight and sound.
2. how to select and use binoculars.
3. bird behavior and adaptations.
4. some methods of studying wild birds.

Upcoming Bird Activities:
- Mountaineer Audubon (mountaineeraudubon.org)

Promotions:
- Purchase a Federal Duck Stamp
  - "As a conservation donation, it [the Stamp] is unparalleled... It's simply the most efficient application of your money to conservation." (Birder's World, August 2006)
  - David Sibley Artist and Author
- Buy Bird Friendly Coffee/Shade Grown: One source is the ACCA.

“According to the Smithsonian Migratory Bird Center and Birds & Beans Coffee, consuming a pound per month of certified bird-friendly coffee supports 1,750 sq ft of shade coffee habitat.”
West Virginia Master Naturalist Class Description (6-05)

Title: BIRDS

Time: 4 hours (classroom and field trip)

1. Overview
   a) **Birds defined**
      (LeJay’s Pet Peeve)- Bird Watching Ethics
      ABA- Principles of Birding Ethics
      Sibley Guides: The Proper Use of Playback in Birding

      *The science is still out…I haven't seen a study that says attracting birds with their own sounds has negative effects. Common sense does tell me not to play the sound over and over, not to play in heavily birded areas, and not to play it around nesting birds, or other birders not in my group. LJG*

   b) Analysis of the 234 regularly occurring WV species: summer, winter, and year-around spp., nesting spp., passage migrants. Current list is maintained on the brooksbirdclub.org
      List of WV Birds assembled by Wendell Argabrite, now maintained by Wil Hershberger (2015)
      Checklist of WV Birds, plus ferns and butterflies

   c) **Rare WV species** and conservation concerns

2. Field identification
   a) Binoculars and spotting scopes
      * All About Birds: Choosing and Using Binoculars
      * Vortex Optics
      * Bird Watcher Digest: Birding Optics

   b) Field guides
      **Books**
      - National Geographic
      - Sibley Guides
      - Peterson Field Guides
      - Crossley Guides
      - Golden Guide: Birds by Chan Robbins, biography (Photo)
      - Kaufman Field Guides
      **Electronic birding:**
      - Thayers- http://www.thayerbirding.com/
      - Handhelds and Pads
        - Sibley eGuide to the Birds of North America
        - iBird
        - Audubon Bird Guide is a free and complete field guide to over 800 species of North American birds, Bird ID
        - Merlin Bird App- Free App from Cornell University
        - More everyday…
c) Strategy for IDing an unknown bird

- Observe thoroughly before turning to field guide – size, colors, markings, vocalizations, behavior
- All About Birds: Building Skills
- Identification - size/shape; color pattern; behavior; habitat; field marks; song
  o Size & Shape - Tiny bird with large head, plump body, narrow tail, and short bill
    - Beaks
    - Feet
  o Color Pattern - Striking shiny black cap and throat against white cheeks. Buffy sides; wings and back soft gray
  o Behavior - Busy, acrobatic, and often in feeding flocks of several species
  o Consider habitat and range
  o Habitat - Forests, woodlots, backyards, and shrubby areas; in the West, associated with deciduous trees or evergreens, early or late succession.
  o Range - Make it a habit to check the range maps before you make an identification.
  o Field Marks: Field marks are the distinctive stripes, spots, patterns, colors, and highlights that birds have in such abundance and variety.

- Birding by sound
  o Songs and Calls
    - Resources:
      - LeJay’s Birding by Ear Mnemonic Notes
      - Macaulay Library
      - Hershberger Nature Photography and Nature Images and Sounds

Activity: Review Common West Virginia birds with Thayer’s
Activity: Bird Walk Around WV Botanic Garden
Activity: Bird Banding Demonstration

3. Behavior and adaptations

a) Mating and nesting, territoriality

b) Habitats,
   - WV Habitat
   - Things you can do
     - Feeding: Helps individual birds, brings problems
     - Window Kills: Recommendations for the American Bird Conservancy Pic1 Pic2

Now numbering well over 100 million in the United States, cats kill approximately 2.4 billion birds every year in the U.S. alone, making cat predation by far the largest human-caused mortality threat to birds.
West Virginia Master Naturalist Class Description (6-05)

c) Migration
- All About Birds: Migration
- Follow Hummingbird Migration
- Bird Cast
- Living on the Wind: Across the Hemisphere with Migratory Birds: Scott Weidensaul (Author)
  - Sample

4. Bird watching and study
a) Birding organizations and publications
- Brooks Bird Club
- Mountaineer Audubon
- National Audubon
- American Birding Association
- American Ornithological Union
- Ralph Bell Bird Club, Waynesburg, PA
- Carnegie Museum of Natural History's Powdermill Avian Research Center
- Birding on Net (What birds are being seen)
- National Bluebird Society
- Purple Martin Conservation Association
- West Virginia Young Birders Club

b) “Citizen Science” projects – reporting what you observe
- Cornell Lab of Ornithology Citizen Projects
- What Bird are being seen by State: WV_Bird
- eBird: Global tools for birders, critical data for science
  - Record the birds you see
  - Keep track of your bird lists
  - Explore dynamic maps and graphs
  - Share your sightings and join the eBird community
  - Contribute to science and conservation
- Mountaineer Audubon Christmas Bird Count
- The Great Backyard Bird Count
- WVDNR: Wildlife Diversity Program’s Annual Winter Bird Count!
- Hilton Pond: Travel to Central American to assist with locating and banding Ruby-throated Hummingbirds.
- Volunteer at Local Raptor Rehabilitation Centers:
  - West Virginia Raptor Rehabilitation Center
  - Avian Conservation Center of Appalachia, Inc.

What to do with a dead bird
  - Banded
  - Not Banded

c) “Orphaned” nestlings:
5) Interpretation - Related to Birds

- "Tilden's principles" of interpretation
  - In his 1957 book, "Interpreting Our Heritage", Freeman Tilden, defined six principles of interpretation.
  - Any interpretation that does not somehow relate what is being displayed or described to something within the personality or experience of the visitor will be sterile.
  - Information, as such, is not Interpretation. Interpretation is revelation based upon information. But they are entirely different things. However all interpretation includes information.
  - Interpretation is an art, which combines many arts, whether the materials presented are scientific, historical or architectural. Any art is in some degree teachable.
  - The chief aim of Interpretation is not instruction, but provocation.
  - Interpretation should aim to present a whole rather than a part, and must address itself to the whole man rather than any phase.
  - Interpretation addressed to children (say up to the age of twelve) should not be a dilution of the presentation to adults, but should follow a fundamentally different approach. To be at its best it will require a separate program.
  - For the past 50 years, Tilden's principles have remained highly relevant to interpreters across the world. In 2002 Larry Beck and Ted Cable published "Interpretation for the 21st Century - Fifteen Guiding Principles for Interpreting Nature and Culture", which elaborated upon Tilden's original principles.

- West Virginia Master Naturalist Class Description: NATURE INTERPRETATION AND TEACHING
  - [http://www.wvdnr.gov/wvmn/NatureInterpretation&Teaching.shtm](http://www.wvdnr.gov/wvmn/NatureInterpretation&Teaching.shtm)

- Multiple Intelligences: When working with a group, remember to include multiple domains.
  - The theory's eight currently accepted intelligences are: (Ref: Educational Psychology, Robert Slavin. 2009, 117)
    - Spatial
    - Linguistic
    - Logical-mathematical
    - Bodily-kinesthetic
    - Musical
    - Interpersonal
    - Intrapersonal
    - Naturalistic

- (Activity) Participants design an interpretation Lesson Plan/Approach on a WV Bird Species to include at least two of Gardner's Multiple Intelligences;

6) Birds and Climate Change- Yale Connections

West Virginia Master Naturalist Class Description (6-05)

- Ecological Disruption in Motion: A Briefing for Policymakers and Concerned Citizens on Audubon’s Analyses of North American Bird Movements in the Face of Global Warming, Audubon, February, 2009
- Kid NASA Website and birds

7) Bird Boxes and Feeders
- All About Nest Boxes and Right Bird, Right House
- Project Feeder Watch
- Nest box placement and sizes
- WOODWORKING FOR WILDLIFE

8) Evaluation: I appreciate feedback from you to adjust to future classes. Please email comments to lejay@oldhemlock.org. Comment on:
- What worked for you?
- What did not work for you?
- What would you want more or less of?
- Suggestions of content to include?
